

# Mangare Stream

2003/04	2007/08
 A narrow stream flows through a dense thicket of trees and lush green vegetation. The water is clear and the banks are overgrown.	 The stream is wider and more open, with a mix of green grass and some bare, brownish soil on the banks. The vegetation is less dense than in 2003/04.
Mge01_04_0000m	Mge01_08_0000m
 The stream flows through a grassy area with some trees. The water is clear and the banks are green.	 The stream is wider and more open, with a mix of green grass and some bare, brownish soil on the banks. The vegetation is less dense than in 2003/04.
